

EXPERIMENT

Camp Cubs Busy Builders

How high can we go? Use a variety of materials--blocks, Legos, sticks, papers--to build. You don't have to be an architect to build! Which is stronger: straw, twigs or bricks? Work together and on your own to build towers, forts and other creations, learning all along the way!

TIGERS Edible Science

Learn the science of food while you taste test something delicious. What makes a vegetable green and why does salad taste so good in summer? Why are some chocolates bitter and how can they turn into such tasty treats? Prepare, cook, mix and taste your way through a variety of sweet and savory treats.

EAGLES 101 Science Experiments

Experience 101 gooey, slippery, slimy, weird, awesome, magical, bizarre, incredible, oozing, bubbling, dripping, bouncing, fun experiments and discover the answers to your tough science questions! Concoct, test and analyze your way to a better understanding of science.

CAMP TNT

A teen-focused experience for youth entering fifth through eighth grades. See page 2 for more information.
